João F G Pozzer

Head of Technology at @Psyze | Software Engineer | Full Stack |
Laravel | TypeScript | NodeJs | Blockchain | Web3 | Ethereum
Miami, Florida, United States

Summary

Passionate about tackling challenges with creativity and high agency, I thrive on solving problems and delivering impactful solutions. My journey into development began with a love for online and strategy games like Age of Empires II (1999), igniting a curiosity about technology and its possibilities.

As a developer, I bring a commitment to excellence in coding, fostering collaboration, and upholding best practices in both technical work and team dynamics.

Skills:

- Frontend: React, Vue3, Inertia.js, Shadcn, TailwindCSS, TypeScript, UI/UX Principles.
- Backend: Laravel v10+, NestJs, Node.js, FastAPI; PHP, TypeScript, Python; Eloquent, Prisma; MySQL, PostgreSQL.
- Development Practices: Version control (Git), Agile Methodologies (Scrum, Kanban), CI/CD workflows.
- DevOps: Docker, Docker Compose, Amazon AWS.
- Additional: Programming Logic, Object-Oriented and Functional Programming, Quality Assurance, API Integration.

Driven by curiosity, high agency and a team-oriented mindset, I aim to continuously evolve, contribute to meaningful projects, and support colleagues in achieving shared goals.

Experience

Psyze

Head of Technology

January 2025 - Present (7 months)

Miami, Florida, United States

As Head of Technology and Co-Founder at Psyze, I achieved something I hadn't anticipated: becoming a high-agency leader.

My contributions so far:

- Built our entire core technology infrastructure from the ground up.
- Transformed conceptual, unoptimized Python AI scripts into production-ready, high-performance CPU and GPU code.
- Developed the first versions of our app with Laravel and Inertia (React), creating two distinct user experiences, one for clients and one for professionals, each with its own layout and UI/UX.
- Integrated all services into Docker containers for streamlined deployment.
- Leveraged cost-effective AWS instances to deliver a high-performance application and run intensive AI video analysis in the background using only CPUs.

KHIZA DAO

Web3 Full-stack Developer

February 2023 - November 2024 (1 year 10 months)

Curitiba, Paraná, Brasil

As a Web3 Full-Stack Developer at a fast-paced startup, I honed my skills in blockchain technologies, utilizing tools like Ethers, BigInt, and Viem to develop and maintain decentralized applications. Working closely with a small and collaborative team, my key contributions included:

- Building secure and scalable applications tailored for Web3 environments.
- Performing code reviews, refactoring, and ensuring system maintainability.
- Implementing robust security measures and adhering to best practices.
- Collaborating directly with team members to tackle challenges and share knowledge.
- Identifying and addressing inefficiencies, while offering feedback to refine project strategies.

This role provided invaluable experience in navigating startup dynamics, fostering teamwork, and delivering impactful solutions in Web3 development.

Unoesc Chapecó

Customer Service Intern
October 2019 - December 2021 (2 years 3 months)
Chapecó, Santa Catarina, Brasil

The Brazilian Federal Revenue Office
Customer Service Intern
March 2019 - September 2019 (7 months)
Chapecó, Santa Catarina, Brasil

Education

Kenzie Academy Brasil
