João Francisco Guarda Pozzer

Software Engineer | Full Stack | Blockchain | Web3 | Ethereum |
Solidity | TypeScript | NodeJs | React
Curitiba, Paraná, Brazil

Summary

Passionate about tackling challenges with creativity and innovation,
I thrive on solving problems and delivering impactful solutions. My
journey into development began with a love for online and strategy
games like Age of Empires II (1999), igniting a curiosity about
technology and its possibilities.

I am a certified Full Stack Web Developer, having graduated from
Kenzie Academy Brazil. As a developer, I bring a commitment to
excellence in coding, fostering collaboration, and upholding best
practices in both technical work and team dynamics.

Skills:

- Frontend: HTML5, CSS3, JavaScript (ES6+), React, Vue.js, Redux,
State Management, Styled Components, Component Libraries, UX
Principles.
- Backend: Node.js, Express, NestJS, Django, Prisma, TypeORM,
PostgreSQL, RESTful APIs, Asynchronous Programming.
- Development Practices: Version control (Git), TDD with Jest, Agile
Methodologies (Scrum, Kanban), CI/CD workflows.
- DevOps: Docker, Docker Compose, Amazon AWS.
- Additional: Programming Logic, Object-Oriented and Functional
Programming, Quality Assurance, API Integration.

Driven by curiosity and a team-oriented mindset, I aim to
continuously evolve, contribute to meaningful projects, and support
colleagues in achieving shared goals.

Experience

KHIZA DAO
Web3 Full-stack Developer
February 2023 - November 2024 (1 year 10 months)
Curitiba, Paraná, Brasil

As a Web3 Full-Stack Developer at a fast-paced startup, I honed my skills in blockchain technologies, utilizing tools like Ethers, BigInt, and Viem to develop and maintain decentralized applications. Working closely with a small and collaborative team, my key contributions included:

- Building secure and scalable applications tailored for Web3 environments.
- Performing code reviews, refactoring, and ensuring system maintainability.
- Implementing robust security measures and adhering to best practices.
- Collaborating directly with team members to tackle challenges and share knowledge.
- Identifying and addressing inefficiencies, while offering feedback to refine project strategies.

This role provided invaluable experience in navigating startup dynamics, fostering teamwork, and delivering impactful solutions in Web3 development.

Unoesc Chapecó
Customer Service Staff
October 2019 - December 2021 (2 years 3 months)
Chapecó, Santa Catarina, Brasil

With the support of UNIEDU, through the research grant, I provided customer service at the Accounting and Tax Support Center - UNOESC (NAF-UNOESC). NAF provides free services for filing individual income tax (DIRPF) and services for Individual Micro Entrepreneurs (MEI). During the period of the research grant, in addition to the more than 200 DIRPF services, I gave lectures, provided training and participated in the local newspaper.

The Brazilian Federal Revenue Office
Customer Service Staff
March 2019 - September 2019 (7 months)
Chapecó, Santa Catarina, Brasil

In partnership with UNOESC - Chapecó, I provided quick assistance to the public regarding CPF, seeking solutions to whatever the client's problem was, for example, a blocked, suspended or irregular CPF. I followed the service protocol, resolved the problem, or if it went beyond the protocol, I was advised

to ask for help from the RFB Coordinator on site. Since the city receives many immigrants, English helped me to serve several foreign clients who came to live in Brazil, such as Haitians and Indians.

Education

Kenzie Academy Brasil
Technical Course, Computer Software Engineering · (November 2021 - November 2022)

Wizard by Pearson
Course Completion Certificate, Teaching English as a Second Language · (February 2016 - November 2020)

University of Western Santa Catarina
Bachelor, Accountancy · (February 2018 - December 2021)
